CERTIFIED EMERGENCY NURSE (CEN)

Review Course & Certification Exam

ABOUT THE CEN
The CEN® (Certified Emergency Nurse) certification is the certification specific to emergency nursing and measures the attainment of a defined body of nursing knowledge pertinent to that particular specialty. A role delineation study is conducted approximately every five years to assure the examination reflects current emergency nursing practice. Although there are CENs throughout the world, the CEN exam is based on emergency nursing practice in the United States.

TESTING AGENCY
Applied Measurement Professionals, Inc. (AMP) is the testing agency that BCEN utilizes for exam development, administration, scoring and analysis. In Saudi Arabia, Taiba Care is an authorized assessment center for all the certification exams including CEN. Taiba Care has tested hundreds of candidates with a high rate of customer satisfaction.

CEN REVIEW COURSE
This course is a review of emergency nursing designed to assist the participant to be successful in obtaining CEN certification. The course offers lectures, graphics, videos and practice questions in many of the areas that are tested on the CEN examination. This review will provide not only a knowledge base for successfully completing the exam, but also a foundation for further study as the participant works towards emergency nursing certification.

While the CEN Exam review course is not designed to teach foundational concepts, it can help participants focus on content areas that may require a more in-depth review, as well as identify familiar content areas for which a more cursory review will suffice.

The agenda corresponds to the content areas of the CEN Exam will cover the contents of the CEN exam. Each session lasts 300 minutes and is led by a trained, CEN-credentialed program facilitator. The teaching method is primarily didactic lecture with various case examples throughout.

While this course cannot assure passage of the CEN exam, it can be effective in the preparation for the exam.

WHAT DO EMERGENCY HEALTHCARE NURSE MANAGERS THINK OF CERTIFICATION?
In a recent study of Emergency Healthcare Nurse Managers their thoughts on certification provided the following data:

- 94% of nurse managers agree that certification is valuable for their staff nurses
- 86% of nurse managers agree that certification is a mark of nursing expertise
- 77% of nurse managers consider personal challenge and self-improvement to be “very important” motivations for nurses to become certified
- 47% of nurse managers whose hospitals are supportive, recognize successful certification with some type of compensation (e.g., bonus or pay increase)

WHY SHOULD A NURSE BECOME CERTIFIED?
Certified emergency healthcare nurses have told us that they experience a number of benefits from being certified, including:

- Increased confidence in their knowledge and skills
- Increased respect from colleagues and peers
- Increased self-satisfaction in validating their knowledge and expertise
- Opportunities for career advancement
- Financial rewards in hourly differentials
- Reduced liability insurance if you hold a CEN certification and are an ENA member

CEN CERTIFICATION EXAM
Taiba Care provides several environments for the administration of online CEN examination service including 3rd party sites/labs. (Typically these are PC labs at host-location).

One of the greatest badges of honor the Emergency Nurse can earn is the title of Certified Emergency Nurse (CEN). This title is earned by few nurses and indicates to peers, patients, families and others that one has demonstrated an exceptional knowledge base in the field of Emergency Nursing.
